

Household Hazardous Waste Products

What makes a product hazardous?

Always read the product labels. Signal words to look for on the label are DANGER, POISON, WARNING, or CAUTION. Products are considered hazardous if they have one or more of the following properties:

- Flammable / combustible - can be easily set on fire
- Explosive / reactive - can detonate or explode through exposure to heat, sudden shock, pressure, or incompatible substances
- Corrosive - chemical action can burn or destroy living tissues or other materials when brought in contact
- Toxic - capable of causing injury or death through ingestion, inhalation, or skin absorption

A List of Common Household Hazardous Products

- Acids
- Adhesives and glues
- Aerosol cans
- Ammunition
- Ammonia
- Antifreeze
- Art and hobby paints
- Asphalt and roofing tar
- Batteries, household or dry cell
